

Benzie Sportsman's Club Pistol Team

Calendar of Activities March - September 08

Ladies Day at the Range—Ladies Only Workshops May 4th, June 14th, July 19th

This event lets the ladies have some fun without the guys around. If there's a handgun in your home, if you have a CCW or if you're just curious this is your day. Our instructors usually bring a variety of handguns that you can try. This is a wonderful opportunity, please don't miss out. Ladies only 1:00—4:00pm Fee \$25.00 for Ladies Day, and \$10.00 for the workshops.

CCW Course (Carry of a Concealed Weapon) May 17th, July 26th, September 20th.

New applicants and renewals are welcome. This is the NRA's PERSONAL PROTECTION IN THE HOME COURSE that meets the state requirements to apply for a concealed pistol license.

AP Shoot (Absolutely Practical) Wednesday nights May 14th through July 16.

The evening starts with a workshop that demonstrates a particular real world or defensive handgun skill. Then shooters can practice that technique or simply shoot for enjoyment, while shooting several scenarios developed to test your skills. You are your own competition. We shoot paper and steel knock down targets. Two facilities to accommodate beginners as well as advanced.

Starting at 6:30 pm Fee \$7.00 (Event Pass available 20% savings)

Bang Clang Shoot March 29th, April 26th, June 7th.

If you're bored with just putting holes in paper this might be for you. All skill levels are welcome as always. We shoot steel and paper targets arranged in defensive scenarios. It is a lot of fun and you get to meet some great people. Fee \$10.00

Individual instruction available by appointment

The range is open to club members, take the opportunity to use the range and participate in one of our programs.

Requirements: Eye and ear protection (always required on the range!) Handgun, belt holster, ammunition. Events using steel targets have additional requirements: **Handguns**, must be center fire only with the minimum caliber being 9mm/.38 special **Ammunition**, no multiple projectile or magnum loads allowed. Bullet velocity should exceed 750 FPS (factory ammunition meets this minimal requirement)

All courses and events are staffed by NRA Certified Instructors and Range Safety Officers
